This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

EXETER: W. ROBERTS, 197, HIGH STREET
SOUTHMOLTON: TUCKER.

1859.

189. f. 225.

☞ The Editor of the Herd Book (Captain Davy) will be ready to supply Gentlemen in America, or elsewhere, with Devons from his own Herd; or, if desired, obtain them from other Breeders.

PREFACE.

TO THE SUBSCRIBERS TO

THE "DEVON HERD BOOK."

My Lords and Gentlemen,

I have the honour to offer you the third volume of "Davy's Devon Herd Book," and venture to hope it may be as useful as the former ones. Having carried out my expressed intentions "To obtain my information from the most authentic sources, to ascertain truth and obviate error," probably I may be excused for observing that the first volume contained the pedigrees of 132 Bulls and 483 Females; and the second those of 221 Bulls and 657 Females; that it is gratifying to me, and must be satisfactory to the public to know, that in no case has the pedigree as given in the Herd Book been disproved, or even questioned. Those anxious to know the history of the importations of Devons into America will find a full explanation in the preface to the second volume, as well as my opinions on the colour of the Devons. I cannot conclude without quoting from Mr. R. Smith's "Report on the Exhibition of Live Stock at Chester," *Royal Agricultural Journal*, vol. 19, part 2. Mr. Smith was a very celebrated

breeder of Shorthorns and Leicester Sheep. At page 370, he says, "The Devons were justly designated the *élite* of the yard." I conclude these remarks with the words of a Shorthorn friend who accompanied me through the Devon classes. He exclaimed, "I am delighted. I find we Shorthorn men have yet much to learn of the true formation of animals; their beautiful contour and extreme quality of flesh surprise me." Again, Mr. Smith writes—"As converters of vegetable into animal food—breed against breed—they are found to *return as much per acre*, or for *weight of food consumed*, as any other breed;" he might have added, and are well adapted to live on poor pastures in exposed situations. The Editor (Capt. Davy) will be happy either to assist gentlemen in their purchases, to supply them from his own herd, or to purchase animals from other herds, charging a moderate commission for the latter.

I have the honour to be,

My Lords and Gentlemen,

Your obedient Servant,

J. TANNER DAVY.

Rose Ash, Southmolton, Devon,

1st August, 1859.

ADDRESSES OF CONTRIBUTORS,

WITH

THE NAMES AND NUMBERS OF THE ANIMALS

THEY HAVE ENTERED.
